## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, 38, 40-41, drawn to an optical write head assembly, classified in class 347, subclass 238.
  - II. Claims 25-37, 39, 42-43, drawn to a circuit for correcting light emission amount, classified in class 347, subclass 236.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention I is tailored to the physical structure of the optical write head, wherein a fixture is provided to connect the plurality of substrates on each of which a large number of light emitting diodes are provided as well as a focusing unit is provided to adjust the position of each of the substrates in the thickness direction of the substrates, while the invention II is directed to a control circuit for correcting the light emission amount of the light emitting diode arrays. The limitations of inventions I and II are therefore mutually exclusive such that the search for one invention would not overlap with the search for the second invention.

Art Unit: 2861

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Attorney Joseph A. Scafetta, Jr. on March 2, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai C Pham whose telephone number is (571) 272-2260. The examiner can normally be reached on M-F 8:30AM - 5:30PM.

Art Unit: 2861

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
